1. In late February 1952, the road bed of the Havlickuv Brod-Brno railroad line was completed. This line was scheduled to be opened to traffic in mid-1953. It is believed that the line was double-tracked in addition to being straightened. After it has been completed, trains can proceed on this line at a speed of 120 kilometers per hour.
2. When the project is complete, Czechoslovakia will have a second double-track East-West railroad connection between Szob (Q 48/H 46), Hungary, and Prague, via Galanta, Bratislava, Brno, Havlickuv Brod and Kolin.
